

KRIŠTOF TEPLAN

IT student focused on game development, currently seeking an internship or part-time job. I have a solid foundation in general IT thanks to my studies at VUT FI, and I'm now specializing in game development at the master's level because of my passion for games and everything related to them. I prefer working in a team rather than solo, as I enjoy collaborating with others. I'm eager to gain real-world experience in the industry.
